

Special Projects

REDISTRICTING. FIRE HYDRANTS. LMI CENSUS DATA.
TORNADO SAFEROOM GRANT.
PARKS AND TRAIL GRANTS. SAFE ROUTES TO SCHOOL.
POPULATION CHANGES. ECONOMIC DEVELOPMENT.

Western Arkansas Planning and Development District, Inc. through GIS is involved in many special projects.

We provide mapping and data analysis for each of our projects.

If you are in need of specialty mapping or data analysis for a project, give us a call. We can help.

We have the software, equipment and training needed to do GIS projects.

We assist our communities in planning, securing funding and administering community and economic development activities.

We were involved in the Census 2010 and are now using that data to help with Re-Districting projects in our area.

We are also working with the Western Arkansas RITA (a coalition of groups to develop Rail, Water, Truck and Air freight for economic development).

We work very closely with the Bi-State Metropolitan Planning Organization to provide mapping to support their program.

We are working with United Way of Fort Smith to provide them with maps for their various projects.

Knowing WHERE things are is the first step to rational decision making.

The possibilities of GIS are unlimited!
